Professional Summary

MCA student and full stack web developer specializing in secure, production-ready web applications using the MERN stack. Experienced in JWT-based authentication, role-based access control (RBAC), AI integration with TensorFlow.js and Google Gemini API, and REST API development. Applies AI-assisted development workflows (Antigravity, Claude) with prompt engineering to accelerate delivery without compromising code quality. Published researcher, Smart India Hackathon 2024 team lead, and UI/UX intern with a track record of shipping complete, deployed software.

Work Experience

UI/UX Design Intern

June 2025 (1 Month)

Srishti Innovative, Technopark, Trivandrum, Kerala

- Designed wireframes and interactive prototypes for web and mobile applications using Figma, reducing design iteration cycles through early stakeholder feedback.
- Conducted usability analysis and collaborated with developers to translate designs into implementation-ready specifications, ensuring on-time delivery across 3 product modules.

Projects

AI Resume Analyzer

May 2026

React.js, Node.js, Express.js, MongoDB, Google Gemini API

Live Demo

- Built an AI-powered resume analysis tool integrating Google Gemini API to evaluate uploaded PDF resumes and return structured ATS scores, skill gaps, and improvement suggestions via JSON response handling.
- Implemented JWT-based authentication with role-based access control (RBAC) — users access personal analysis history while admins view and manage all user analyses through a protected dashboard.
- Developed PDF text extraction pipeline using Multer and pdf-parse; applied AI-assisted development workflows (Antigravity, Claude) with prompt engineering to accelerate architecture and API design.

Waste Stream Visual Auditor

April 2026

React 19, Node.js, Express.js, MongoDB, TensorFlow.js, Teachable Machine

- Integrated TensorFlow.js and Teachable Machine to classify waste types from uploaded images, enabling AI-powered automated categorization at the point of citizen reporting.
- Implemented JWT authentication with RBAC across three roles — citizen, field worker, and admin — each with dedicated protected dashboards and approval workflows.
- Developed 8+ REST API endpoints for GPS-based waste report submission and built an interactive analytics dashboard using Recharts to visualize regional waste trends in real time.

College Facilities Management System

October 2025

Node.js, Express.js, MongoDB, EJS

- Implemented session-based authentication with role-separated dashboards for students and admins, ensuring only authorized users could approve or manage facility bookings.
- Built a full CRUD booking system with admin approval workflow, eliminating double-booking conflicts and reducing manual coordination overhead.
- Published findings as *EduNexus – College Facility Booking Platform* in the International Journal of Engineering Science Technologies (ISSN: 2456-8651), Vol. 10, No. 1, February 2026.

Skills

Languages: JavaScript (ES6+), Python, PHP, HTML5, CSS3

Frameworks & Libraries: React.js (v19), Node.js, Express.js, EJS, Recharts

Databases: MongoDB, MySQL

Security: JWT Authentication, Role-Based Access Control (RBAC), Protected Routing, Session Management

AI & Integration: TensorFlow.js, Teachable Machine, Google Gemini API, Multer, pdf-parse

AI-Assisted Development: Antigravity, Claude – Prompt Engineering for code generation and API design
Tools & Platforms: Git, GitHub, Figma, Vercel, Render, MongoDB Atlas

Education

Master of Computer Applications (MCA) <i>Saintgits College of Engineering (Autonomous), Kottayam, Kerala</i>	<i>2024 – Present</i> CGPA: 8.13 / 10
Bachelor of Computer Applications (BCA) <i>Kristu Jyoti College of Management and Technology, Changanassery, Kerala</i>	<i>2021 – 2024</i> CGPA: 7.28 / 10
Higher Secondary Education (Science) <i>St Berchmans Higher Secondary School, Changanassery, Kerala</i>	<i>2021</i> Percentage: 89.1%

Certifications

• Complete React JS Developer – Udemy	<i>2024</i>
• NodeJS Masterclass (Express, MongoDB) – Udemy	<i>2024</i>
• Complete Guide in HTML and CSS: Build Responsive Website – Udemy	<i>2023</i>

Achievements & Leadership

- **Research Publication:** Authored *EduNexus – College Facility Booking Platform*, published in the International Journal of Engineering Science Technologies (ISSN: 2456-8651), Volume 10, Number 1, February 2026.
- **Team Leader – Smart India Hackathon 2024 (MIC & AICTE):** Led a 6-member team across 4 development sprints, coordinating task allocation and delivering a fully functional prototype within a 36-hour competitive window.
- **Student Leader – National Service Scheme (NSS), 2021:** Coordinated community engagement programs for 50+ volunteers, demonstrating organizational and communication skills in a high-responsibility leadership role.
